InnoSignageBox

Product overview

InnoSignageBox is used in digital signage systems to manage and display content on digital screens or all type of displays, such as standard monitor, TV, Video Wall and new model display with advanced technology and standard interfaces. It serves as a media player and content delivery system for digital signage applications.

InnoSignageBox brings the benefits that standard screens become into dynamic information displays at HD to UHD resolution over network connections to the Content Management System by either Ethernet network or wireless network.

Hardware Specifications

Item	InnoSignageBox-I	InnoSignageBox-II
Memory	1G	2G
Flash	16G	32G
